## **Abstract**

In this report, we present the validation results for the implementation of the logging strategy the Extended Constant Eviction Scheduler (ECETES). The account of these results are not intended to be stand-alone, but require the insights published in other sources.

The implementation that was validated through this series of tests is available as a technical report [1].

Properties	Task A	Task B
Deadline [time units (tu)]	2000	8000
Execution time [tu]	990 - 999	3960 - 3999
Data-state [bytes]	1100	1100

Table 1: Simulator taskset 1.

Properties	Task A	Task B
Deadline	4000	8000
Execution time	990 - 999	3960 - 3999
Data-state	1100	1100

Table 2: Simulator taskset 2.

Properties	Task A	Task B	Task C
Deadline	2000	4000	8000
Execution time	990 - 999	990 - 999	990 - 999
Data-state	1100	1100	1100
